EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Mr. Robert J. Van Der Wall (Reg. No. 28,125) on 01/06/2006.
3. The application has been amended as follows:

Claim 1 has been replaced as follows:

1. An impressor assembly disposed in and as a part of a labeling device used for processing a multiplicity of food and beverage cans for impressing at high speed protective members disposed on rims of can lids comprising an impressor head having a base, a tooth descending from the base so that when the impressor head is moved by the labeling device towards each of the can lids, the tooth engages each of the protective members and impresses each of the protective members against each of the can lids in a skin tight and wrinkle free manner, and then is withdrawn by the labeling device from each of the protective members and can lids, and wherein each of the rims has a first diameter and the tooth of the impressor assembly has a second diameter, the second diameter being slightly less than the first diameter so as to press each of the protective members between a rim wall of each of the cans and the tooth of the impressor assembly.

Claim 2 has been cancelled.

Art Unit: 3721

4. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose and/or teach an impressor assembly disposed in and as a part of a labeling device that comprises an impressor head which includes a base and a tooth descending from the base for impressing protective members disposed on rims of can lids, wherein the rims has a first diameter and the tooth of the impressor assembly has a second diameter which is slightly smaller than the first diameter so as to press each of the protective members between a rim wall of each of the cans and the tooth of the impressor assembly, and wherein the impressor assembly is withdrawn from the protective member by the labeling device after the impressor assembly is moved by the labeling device to impress the protective member against the can lid.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Louis K. Huynh whose telephone number is 571-272-4462. The examiner can normally be reached on M-F from 9:30AM to 5:00PM.

7. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rinaldi I. Rada can be reached on 571-272-4467. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
